Micro SD transfer of digital video and stills to phone or PC.

Wireless Viewing/Recording up to 32' away.

Wireless Display/Recorder

Attaching in seconds to a QuickView pole, upLink™ displays footage on a 3.6" color LCD and captures up to 16 GB of AVI video and JPEG clips. For wireless viewing, simply slide the monitor from the dock and carry it up to 32' away. Several monitors can receive the same signal for multi-person viewing.

Viewable from a 50-deg side-angle, the TFT display pivots for easy viewing, even when the QuickView is deeply extended or used for overhead applications. upLink™ accepts NTSC or PAL. It runs off batteries, or mains power with an optional AC adapter.

Compatible with All QuickView Models
